

## Bacteria prey on dead and decaying matter!

Millions of people suffer allergies, skin irritations, asthma and other respiratory diseases. Medical research has shown that microbial proliferation of moulds and bacteria are a major cause of these complaints.

They are a major food source of dust mites and provide an unhealthy environment for humans.

Bacteria once in place may travel at about 50-60 body lengths per second. This would be the equivalent of a 1.8 metre (6 feet) tall man running at 100 meters per second, 9 times faster than the world record. Cheetahs are the fastest animals on land but even they only move at about 25 body lengths per second.

### Real Solutions for Real Issues!

In a world where general health issues are becoming more and more critical HealthGuard® provides a safe, effective and environmentally sound solution to a wide range of common health problems caused by ineffective bacteriological controls. A healthy sleep environment is most important.

HealthGuard® is a revolutionary group of multi-functional products that safely and organically control the levels of bacteria, spores, viruses and moulds.

HealthGuard® utilizes nanotechnology - nanotechnology is used to provide a strong micro bond of the HealthGuard™ with the surface to ensure long lasting performance. It is blended into the Kleenhealth bedding products to provide additional protection for you and your family against bacteria and moulds while maintaining the comfort and appearance of your valuable bedding and furnishings.

HealthGuard® is sold all around the world under license and is proudly Australian made and owned.

# Anti Bacterial

Premium Protection

# Anti Bacterial

Protection against the spread of bacteria.

## Kleenhealth Sleep Is Very Important

Sleeping well helps us work rest and play at optimum levels. Untreated or inadequately treated mattresses can grow a harmful biomass of bacteria, moulds, dead skin and other microbes decaying inside your mattress. A healthy sleep zone reduces the chances of attracting allergies and other ailments of the skin and respiratory system. HealthGuard® Premium Protection Anti Bacterial is a safe, non-invasive, multi-functional anti bacterial treatment to be used in pillows, foam and fabrics of bedding. Kleenhealth bedding products holds the bedding industry exclusive on this product.

## Kleenhealth Shut Down Mode

During every sleep experience our body moves into shut down. This sleep period provides the perfect environment for recovery, a chance to recharge the batteries of life. Our immune system can have a chance to recheck itself and reset for the days ahead. It is most important that we do not place our children and families at unnecessary risk and treat our beds against harmful mycotoxins from microbial growth of bacteria and mould spores.

## Kleenhealth Health And Wellbeing

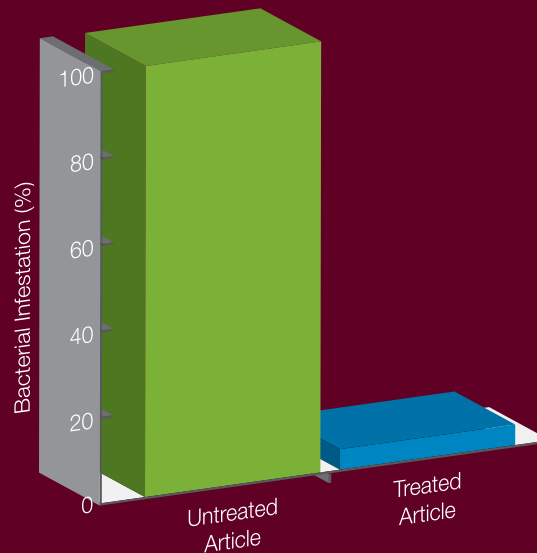

The comforts and benefits you have enjoyed resting on your Kleenhealth bedding product is greatly enhanced with the addition HealthGuard®. Bacteria can invade your sleep space, are harmful and may leave your body with allergies of the skin or respiratory system. Kleenhealth products lead the bedding industry with this world class initiative.

## Kleenhealth Advantages

Bacteria and germs are harmful and live in immense populations inside your pillows and your mattress. Bacteria and spores are responsible for triggering allergenic irritations and exacerbating sinusitis, hay fever, conjunctivitis, glue ear and eczema. The best way to prevent becoming affected is to avoid have the colonies grow in the first place. HealthGuard® Premium Protection is the real solution.

## Kleenhealth Proven Performance

Independent testing show the effectiveness of HealthGuard® Premium Protection in the foams, fabrics and pillows of Kleenhealth bedding.
